The apprenticeship tax for the training of top-level athletes

France is engaged in a major project with the Paris 2024 Olympic Games. Since its creation, INSEP has accompanied the selected Olympic and Paralympic athletes. Currently, more than 800 high-level athletes benefit from INSEP's services and facilities on a daily basis in preparation for the Paris 2024 Olympic Games. Our establishment invests in their academic and/or professional training.

Offering quality training, adapted to the specific life and training rhythm of high-level sportsmen and women (distance, irregular hours, training courses and travel) is a daily challenge.

To finance the investments necessary for the implementation and success of the athletes' dual project, the apprenticeship tax is a fundamental resource. It enables us to offer training in several fields - business, journalism, sport, etc. - and to acquire the tools that are essential for distance learning based on digital innovation in the service of performance.

If your company shares the same ambitions as our institution, to continue to offer high-level athletes excellent training that meets the company's expectations, please donate your apprenticeship tax to INSEP
